Sacramento, CA 95826

Dear Mr. Gauff:

### RUBBERIZED ASPHALT CONCRETE TECHNOLOGY CENTER JULY 1997 STATUS REPORT

The Rubberized Asphalt Concrete Technology Center became an entity this month. I have established an office in the County of Los Angeles, Department of Public Works, Materials Engineering Laboratory with the following telephone numbers:

1-888-777-4775 (Toll free)  
626-458-1773 (Los Angeles area)  
213-221-6501 (Fax)

If I am not in the office, the presence of a voice mail message is transmitted directly to my pager. This allows me to respond very quickly to inquiries.

I met with various "experts" in the field of Rubberized Asphalt Concrete (RAC) in order to gain additional information on the advantages of RAC and the problems that have been encountered and resolved through the years.

As I mentioned in our July 21, 1997 meeting, I am in the process of bringing in Kathi Delegal of the County of Los Angeles Marketing Office to assist me with the development of the Internet web site, brochures, and informational releases. Ms. Delegal will be on board in September 1997 and will work a maximum of 500 hours per year. I will be sending you a complete resume of her qualifications later this month.

22-6

Mr. Nathan Gauff  
August 7, 1997  
Page 2

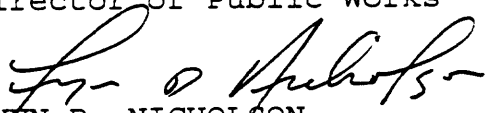

As you can see, this month was spent primarily in setting up the Technology Center office, acquiring data and getting ready for future presentations to City and County engineers statewide. Invoices to CIWMB for services performed in July 1997 will be forwarded to your office later this month.

Enclosed for your information are the Assistance Records for July, 1997, a copy of the article that appeared in the July issue of the RPA News, and a copy of correspondence to Mr. Paul S. Kobelt of the Public Works Journal Corporation.

If you have any questions regarding this matter, please contact me at 1-888-777-4775.

Very truly yours,

HARRY W. STONE  
Director of Public Works

  
LYNN D. NICHOLSON

Dear Mr. Gauff:

**RUBBERIZED ASPHALT CONCRETE TECHNOLOGY CENTER**  
**AUGUST 1997 STATUS REPORT**

The August 7, 1997 letters (copies enclosed) were sent to the Public Works agencies attendees of the CIWMB May 1997 Workshops. Response has been somewhat disappointing with only three return calls:

Ms. Beth Eckl of the Alameda County GSA contacted me. She is very interested in a meeting to discuss ideas on how to reduce the cost of rubberized asphalt concrete and its noise reducing benefits. I have tentatively scheduled a meeting with her and her public works staff for late September, 1997.

Mr. Brian Mathews of the Alameda County Waste Management Authority is setting up a Rubberized Asphalt Concrete (RAC)/Recycled Asphalt Pavement(RAP) workshop on November 5, 1997. I will do the session on RAC, Jack Van Kirk is scheduled to do the RAP session. Other speakers are also scheduled.

I will meet with Ms. Laura Breen of the Sacramento County Department of Regional Parks, Recreation, and Open Space on September 22, 1997 to discuss their plans for a two-mile resurfacing/widening project on the American River Trail.

Ms. Donna Carlson of the Rubber Pavement Association (RPA) has offered to set up three workshops. She will send her proposal outlining what RPA will do and the costs involved to the Technology Center.

Mr. Butch Britt of the County of Ventura advised that they have a \$2.2 million rubberized asphalt concrete resurfacing project under way. This is their first rubber project but they are familiar with the use of RAC and do not anticipate any problems.

I provided information about the Technology Center to Mr. Miles Moore for an article in the next Washington Tire Report. 22-8

Mr. Nathan Gauff  
September 10, 1997

Ms. Kathi Delegal is now assisting me with the development of the Internet Web Site, brochures, informational releases and conferences.

I have made arrangements to attend the following conferences:

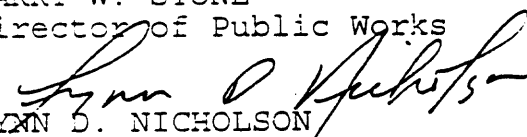

- University of California, ITS seminar  
Anaheim, California  
October 2 and 3, 1997.  
Brochures will be distributed.
- California League of Cities 99th Annual  
Conference/Exposition  
San Francisco, California  
October 12 - 14, 1997  
Brochures will be distributed. The Technology Center  
will have a display booth if a booth becomes available.
- CSAC 103rd Annual Meeting/Trade Show  
San Francisco, California  
November 18 - 21, 1997  
The Technology Center will have a display booth.

Also enclosed for your information are the Assistance Records and copies of correspondence for August 1997.

If you have any questions regarding this matter, please contact me at 1-888-777-4775.

Very truly yours,

HARRY W. STONE

Dear Mr. Gauff:

**RUBBERIZED ASPHALT CONCRETE TECHNOLOGY CENTER**  
**SEPTEMBER 1997 STATUS REPORT**

Our work during September 1997 consisted primarily of developing the enclosed brochure and preparing for the UC Berkeley, ITS Symposium in Anaheim on October 2 and 3, 1997; the League of Cities 99th Annual Conference/Exposition in San Francisco on October 12 through 14, 1997; the September 30 and the November 5, 1997 Alameda County workshops; and the CSAC 103rd Annual Meeting/Trade Show in San Francisco on November 18 through 20, 1997. We will have a display booth at the League of Cities and CSAC conferences. I will give a short presentation at the CSAC General Meeting on November 20, 1997.

I am very pleased with the progress the Technology Center has made in spreading the word about the benefits of using RAC. The September 22, 1997 meeting with Sacramento County Parks was very productive. The mini-workshop for the Alameda County GSA on September 30, 1997 went very well as did the ITS Symposium in Anaheim (See enclosed summaries).

22-10

Dear Mr. Gauff:

### RUBBERIZED ASPHALT CONCRETE TECHNOLOGY CENTER OCTOBER 1997 STATUS REPORT

October 1997 was a busy month for Kathi Delegal and I. As reported last month we attended the U.C. Berkeley, ITS Symposium in Anaheim, California on October 2 and 3. Brochures describing the role of the Center and the benefits of using crumb rubber were distributed to over 150 attendees.

October 12-14, 1997 we participated in the League of California Cities 99th Annual Conference/Exposition at the Moscone Center in San Francisco. We talked with over 150 City delegates that stopped by our booth and distributed over 400 brochures to council members and staff. Our display received a lot of interest.

There are two major events scheduled for November 1997. On November 5 we will participate in a rubberized asphalt concrete workshop sponsored by the Alameda County Waste Management Authority. On November 18-20 we will have a booth at the California State Association of Counties 193rd Annual Conference and I am scheduled to give a brief presentation at the General Session.

I am looking forward to meeting with you and the Board members on December 2, 1997 to update the Board on the accomplishments of the Center and to discuss additional funding for Fiscal Year 1997-98.

Enclosed for your information are the Assistance Records and copies of correspondence for October 1997.

If you have any questions regarding this matter, please contact me at 1-888-777-4775.

Dear Mr. Gauff:

**RUBBERIZED ASPHALT CONCRETE TECHNOLOGY CENTER**  
**NOVEMBER 1997 STATUS REPORT**

As I mentioned in last month's report, we participated in two major events in November. On November 5, 1997 Kathi and I attended a workshop sponsored by Mr. Brian Mathews of the Alameda County Waste Management Authority. Approximately 120 city and county Public Works personnel were present. Presentations were made by Donna Carlson of the Rubber Pavements Association, Jack Van Kirk, formerly of Caltrans, Ross Kashiwagi of Granite Construction and myself. The workshop was well received by the attendees.

On November 18-20, 1997, we had a booth display at the California State Association of Counties (CSAC) conference in Burlingame, California. The conference was attended by 475 County Officials. We distributed over 250 brochures to County Officials that visited our booth. On November 20, 1997 I made a presentation to the County Engineers Association of California at their annual meeting.

We also mailed brochures to over 600 City Engineers and Directors of Public Works. To date we have received business reply cards from approximately 20 percent of the cities requesting additional information.

I am looking forward to meeting with you and Ms. Martha Gildart on January 7, 1998 to discuss our presentation to the Policy Committee on February 10, 1998.

Enclosed for your information are the Assistance Records and copies of correspondence for November 1997.

If you have any questions regarding this matter, please contact me at 1-866-777-4775.

Dear Mr. Gauff:

### RUBBERIZED ASPHALT CONCRETE TECHNOLOGY CENTER DECEMBER 1997 AND JANUARY 1998 STATUS REPORT

In December 1997 and January 1998 we met with several City engineers and industry officials regarding the benefits of using crumb rubber. We also contacted the public works officials that asked for more information as a result of the brochures we mailed out in November 1997.

On December 23, 1997 I met with Richard Burt, City Engineer of Torrance, California regarding a recent Caltrans project on Hawthorne Boulevard. The project is raveling at the lane lines and joins. I agreed to attend a meeting with the City and Caltrans to further discuss the issues.

On January 29, 1998, we had a booth display at the APWA Pavement Management Seminar in Carson, California. The seminar was attended by over 100 public works officials from the surrounding area. On February 2, 1998, we will speak at the Orange County Engineers Association Meeting. On February 19, 1998, we will have a booth display and course on rubberized asphalt at the APWA/MSA Interchange South Conference in Ventura, California.
